

NOTES FOR SERVICE CREWS

DAY 1 SERVICE

DAY 2 SERVICE

Fuel can only be dispensed by the official re-fuelling service provider. The re-fuelling stations will be located as following:

Lakeside, Llandrindod Wells	Prior to Day 1 start only
Radnor Forest	Used twice each day
Llanbadarn Fynydd	Village Hall
Cwmysgawen Forest	Before Abbeycwmhir Test on Day 1, after on test Day 2.

Please note that there is no pedestrian or vehicular access to the refuelling areas. This is particularly important at the forest locations as anybody attempting access in a vehicle will be DRIVING AGAINST THE COURSE and a serious accident could result.

The Service Route can be downloaded from the W2D website which should be followed by those who wish to service their riders during the event (NO DISPENSING OF FUEL!!). This has been devised to minimise disruption to local residents. Please do not deviate from this route as it will create unwanted congestion on narrow country lanes or conflict with the competitor route.

The service route should be driven anti-clockwise on Day 1 and clockwise on Day 2 and will be marked with above signs; blue for Day 1 and red for Day 2. The service points are located at each of the Special Tests.

Servicing is also allowed at the Lakeside at the end of Day 1. Park sensibly and please make every effort to minimise disruption, do not make a mess and TAKE YOUR LITTER AWAY WITH YOU.

It is ESSENTIAL that Environmental Mats are used at all service points and at your van/trailer when working on your machine to contain any spillage of fluids. Just consider, would you like oil spilt on your front lawn or outside your house!

Remember that the future running of the event is dependant upon the goodwill of local people and please make every effort not to inconvenience those not involved in the event.
